

HOW TO APPLY YOUR LABEL

1. Print label onto plain white copy paper (no sticky paper required).
2. Cut out your label along the dotted lines.
3. Coat the back of the label with cold milk by either using a paintbrush to brush the milk on, or by floating the back of the label in a dish of milk. Be careful not to soak through the paper.
4. Affix the label to your glass bottle.
5. Enjoy!

TO REMOVE: Soak the bottle with label in warm water, and the label will slide right off.
