BREWHAUS

DISTILLING EXPERTS

Brewhaus is the oldest small scale distiller manufacturer and distilling supplies distributor in the USA. We were established in 1992, and have continued to innovate and develop new products for the hobby distiller and small to medium sized commercial distiller ever since.

For service and support, you can trust us with all of your distilling needs!

Made right here in Texas!

That's right, many of our distillation columns and other welded parts are actually manufactured by Brewhaus, and not just imported from China and passed off as our own. We design, cut, and weld all of our Essential Extractor series columns, and the bubble plate columns designated as Made in the USA. It starts with cutting all of our sheet and tubing with a fiber optic laser cutter to ensure not only precision, but to reduce the impact of cutting on the metal. We then weld almost exclusively using fiber optic laser welding. All of our welded parts are then tested to several times their working pressure, and finally polished using not abrasives, but an electrochemical weld polisher, which not only removes the discoloration but also passivates the stainless steel, leaving it protected from corrosion. No other small-scale distiller supplier in America is able to offer the superior quality distillers that Brewhaus manufactures.

Supporting America where we can!

We use as many parts as possible from American suppliers, but unfortunately, many parts simply are not made in the USA anymore. For these parts we must import them from suppliers in other countries.

High Spirits™

Urea-Free Turbo Yeast and Specialty Yeast Made in the USA!

Brewhaus is the only US manufacturer of a full line of Turbo Yeasts and Specialty Yeasts. It took more than four years to complete the development of our first turbo yeast, and we have expanded the line to a 24-hour and 48-hour Turbo Yeast, along with specialty blends for molasses (rum), whisky, grain vodka, and a high-ester formation Fruit & Schnapps yeast. Each of these yeasts are blended and nitrogen packaged in-house for maximum freshness and viability. You simply will not find better turbo yeasts anywhere!

We make it- we do not just slap our label on someone else's product!

Stills (US Made*)

*Columns are made in the USA using domestic and imported materials

Essential Extractor columns are made right here in our Texas facility, and come with our **Lifetime Warranty against defects in material and workmanship.** All of our complete stills come with kettle, column, hoses, column filling, thermometer, water control system, and submersible pump. Keg Kits include all of these items less kettle

Stills (US Made*)

*Columns are made in the USA using domestic and imported materials

Brewhaus Flute (Bubble Plate) columns are made right here in our Texas facility, and come with our **Lifetime Warranty against defects in material and workmanship.**

All of our complete stills come with kettle, column, hoses, wireless digital thermometer, water control system, and submersible pump.

All Brewhaus Flute columns include a wireless digital thermometer.

Brewhaus Flute columns include stainless steel bubble plates and a Neutralizing Chamber with Copper Spiral Packing to neutralize sulfur compounds. This is exclusive to Brewhaus columns, and gives you maximum flexibility by making it possible to remove copper from the system while still keeping the bubble plates in the column for reflux distillation.

Prices include Wireless Digital Thermometer. You can also add fittings to your kettle to customize it for your personal needs.

Stills (Imported)

These imported columns are the same columns as most resellers in the US are offering. They are not made in the USA, and while beautiful, the quality control is not as stringent as our US made columns, so they often come with some variance and are not pressure tested for leaks by the manufacturer.

Our imported flute columns come with copper bubble plates and analog dial thermometer.

Kettles

Imported Kettles

Our imported kettles use a compression clamp system to ensure a full seal of the lid to the kettle. Ear clamp systems result in flexing of the lid causing the potential for vapor leaks.

Turbo Yeast

High Spirits™

High Spirits Turbo Yeasts and Specialty Yeasts are the result of more than three years of development, and are made using only the highest quality ingredients available. They have been supplied to the commercial distilling industry in bulk format, and are now available in single-use sachets. All High Spirits yeasts are Urea-Free!

Manufactured by Brewhaus in the USA!

All of our Turbo and Specialty Yeasts are designed to ferment a mash of 25 liters.

30001100 **High Spirits Turbo 24, 210g** 4.89
 High Spirits Turbo 24 is our fastest, cleanest fermenting yeast, capable of fermenting 13lbs (6kg) of granulated sugar in a 6.5 gallon (25L) wash in as little as 24 hours. It is extremely temperature tolerant, up to a liquid temperature of more than 100F, although it is best kept below 100F during fermentation.

30001110 **High Spirits Turbo 48, 175g** 3.99
 30001111 **Bulk, 38.9lbs 339.00 339.00**
 High Spirits Turbo 48 can ferment to 14% in as little as two days, or up to 18% in as little as 4-5 days. It uses an extremely temperature tolerant and low-volatile producing yeast strain for fast, clean fermentation.

30001120 **High Spirits Fruit & Schnapps Pot Distilling Turbo Yeast, 67g** 2.99
 30001121 **Bulk 13.4kg 395.00 395.00**
 High Spirits Fruit & Schnapps Pot Distilling Turbo Yeast is a high flavor and aroma yielding yeast strain combined with a special formulation of micro and macro nutrients, vitamins, and minerals deficient in most fruit washes. The result is a fast, complete fermentation with a strong flavor profile, ideal for schnapps and other pot distilled spirits.

30001165 **High Spirits Rum Turbo Yeast, 76g** 3.29
 30001166 **Bulk, 40.2lbs 299.00 299.00**
 High Spirits Rum Turbo Yeast is specially formulated for the production of rum using a molasses wash. The yeast strain selected is ideal for fermentation of molasses, and the nutrient mix is adjusted to provide just the nutrients, minerals, and vitamins lacking in molasses. This ensures a strong, complete fermentation with maximum rum character, while reducing byproduct production and other contributing off-flavors.

30001180 **High Spirits Grain Vodka Turbo Yeast with Gluco-Amylase Enzyme, 75g** 3.29
 30001181 **Bulk, 34.3lbs 309.00 309.00**
 Our Grain Vodka Turbo Yeast is specially formulated for the production of ultra clean vodka using a grain wash. Gluco-amylase enzyme breaks down carbohydrates into fermentable sugars, getting the most alcohol from your grain.

30001190 **High Spirits Whisky Yeast with Gluco Amylase Enzyme, 25g** 3.39
 30001192 **Bulk, 27.8lbs 579.00 579.00**
 Our Whisky Yeast uses a specialized whisky yeast strain, combined with micro nutrients and gluco-amylase enzyme for maximum flavor and a strong fermentation. Use of a whisky yeast strain increases congener production, resulting in more flavor and aroma, while the addition of micro nutrients ensures healthy yeast growth and minimum negative byproducts.

30001195 **High Spirits DADY, 500g** 13.99

Turbo Yeast

The Original Prestige

All Gert Strand Turbo Yeasts ferment very effectively. These turbos are all-natural yeasts, and are all in one bag, with the nutrients and the yeast mixed.

All of our Turbos are designed to ferment a mash of 25 liters.

30001060 **Turbo Pure 48 (14-18%)** 5.99

Prestige Turbo Pure 48 will ferment 6-8kg of sugar in a 25L wash in as little as 2 days. Turbo Pure 48 is specially designed for a pure fermentation, and offers the lowest volatile production yeast available plus special anti-volatile producing agents, and a combination of nutrients and minerals for rapid fermentation.

30001000 **Prestige 8kg Turbo** 6.59

Prestige 8kg Turbo Alcohol Yeast offers a clean fermentation up to 18% alcohol in approximately 7 days. With controlled temperature the 8kg Turbo Yeast can ferment to over 20% abv.

30001040 **Black Label Turbo** 4.99

30001041 **Black Label Turbo, 1kg** 44.99

Black Label Turbo 14-17% alcohol yeast ferments extremely cleanly, and can be scaled to large batch fermentation.

30001045 **Black Bull Turbo** 3.79

Black Bull Turbo is a great, low cost turbo yeast that offers fast, clean fermentation at a great price.

30001065 **Rum Turbo Yeast** 4.79

Special yeast strain and nutrient blend for molasses fermentation.

30001080 **Vodka Yeast with AG and nutrients** 5.99

Real Distillery Vodka Yeast with Amyloglucosidase. Also includes nutrients and minerals missing from many grain mashes, but necessary for clean, complete fermentation.

30001090 **Whisky Yeast with AG** 6.89

Real Distillery Whisky Yeast with Amyloglucosidase.

Essences

High Spirits™

High Spirits essences are made using only the finest quality ingredients available, including special smoothing agents for liqueurs, to produce the highest quality spirits and liqueurs possible. By increasing the volume of essence we are able to provide more robust flavor with more subtle nuances, resulting in more true-to-style finished products. Packing in printed, bottle shaped foil pouches provides a great look while dramatically reducing the shipping weight and cost.

Prestige Ultra Premium Essences

The Prestige Ultra Premium Essence line uses a different solvent able to extract and hold oils that our standard base cannot. The result is the pinnacle in essence quality, and the final liquor.

The Ultra Premium Essence line replaces the Alcohol Based line of the past. The Ultra Premium line is an entirely re-development of the previous essences, using the highest grade raw materials available today.

Aging Supplies

Oak Products

30007000 Oak Chips, Medium Toast, 1 lb.	7.39
30007010 Oak Chips, Heavy Toast, 1 lb.	7.39

Our Oak Stix are approximately 6.5"x2.5"x0.5". The larger format results in less astringency, producing a more mellow, smoother character. Oak Stix can also be easier for the home user to char for use in making whisky.

30007020 Oak Stix, Balanced Toast, 6 stix (approx. 1 lb.)	16.99
---	-------

Oak Kegs

Brewhaus Oak Kegs

Our oak kegs are made for Brewhaus by a commercial cooper in Mexico, who also makes barrels for commercial distilleries. They are made using new American Oak, then charred or toasted to our specifications. We use upgraded galvanized bands to eliminate rusting, which can be an issue with standard painted black bands. Our kegs include a wooden spigot, stand, and bung. The quality barrels are great for aging your wine and spirits, and are guaranteed to seal!

#N/A

Charred Kegs are intended for aging of spirits

#N/A

Toasted Kegs are used for aging of wine or as secondary aging for some spirits

Distilling Supplies

For those living in free countries, activated carbon is used to purify alcohol from off taste and smell. For our other customers, activated carbon is used to purify the water for wine and beer making, etc., before fermentation begins. Wine and beer consist mostly of water, and a good tasting water is important for a good product. There are over 200 brands of activated carbon on the market. Only the best have been selected.

40001020	Activated Stone Carbon- Premium, 1.7L, 0.4-0.85mm	7.29
40001021	Activated Stone Carbon- Premium, 0.4-0.85mm, 12.5kg	109.99

Distilling Supplies

These high quality testing instruments are manufactured in Germany by Widder. Our German products are more precise than those that are regularly scaled. The 30cm Alcoholmeter is a 0-100% instrument, and our 30-60% instruments are even more precise, with finer graduations.

- 40005005 Alcoholmeter, 0-100% 30cm 4.99
- 40005020 Alcoholmeter, 30-60% with thermometer- professional quality 14.95

Our hydrometers are of laboratory quality, and are not generally sold in home brew shops. While a laboratory hydrometer is more expensive, it gives a very accurate reading. Made by Widder, Germany.

- 40005105 Hydrometer, 30cm, dual scale, Premium 4.99
- 40005000 Test Pack 13.99

All instruments are of laboratory quality. The accuracy and quality of our instruments are excellent, usually far better than those sold in home brew shops. Made by Widder, Germany.

- 40005200 Measuring Cup, 10-40ml 0.25
- 40005215 Test Cylinder, Glass, 13" 5.99
- 40005210 Measuring Cylinder, 250ml 9.99

- 40005500 Laboratory Thermometer, 0°F-230°F, -20°C-110°C 4.99
- 40005505 Floating Thermometer, 12" 4.99
- 40005510 Thermometer- Stick-on, 5" long 1.49
- 40005530 Digital Thermometer 9.95
- 40005520 Wireless Digital Thermometer 69.95
- 40005550 Sleeve for thermometer with 3/16" hole (for laboratory thermometer) 0.69
- 40005555 Sleeve for thermometer with 1/8" hole (for digital thermometer) 0.59
- 40005600 pH Meter 29.95
- 40005700 Stainless Steel Parrot 69.99

Books

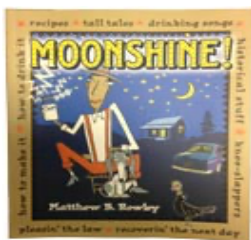

- 70001025 **Distiller's Guide to Rum** 27.95
 Distiller's Guide to Rum brings you the story of rum and how it is made, the ingredients, equipment and processes used to make rum; the lubricious effects of barrel aging, and the various ways that it is done. And, a step-by-step description on how to distill and age rum— including a recipe.

- 70001000 **The Home Distillation Handbook** describes how to make alcoholic spirits at home. NOTE: This process is illegal in North America, however, the construction of a distillation apparatus following the directions in the book is not, and the information can be read in all democratic countries. The information given in the book is not intended to encourage the manufacture of alcohol. Possibly the best book written on the subject, it describes in detail how you can make your own spirits. 15.95

- 70001010 **Making Pure Corn Whiskey, Second Edition** 24.95
 Gives a thorough treatment of the history and the methods of making whiskey, and explains how to make a high-separation fractionating still to distill it with. This is the book the home distiller needs to learn how to "make the cut", that elusive skill that makes the difference between making real whiskey and just flavouring alcohol. This process is also used to make real rum, brandy, and schnapps.

- 70001015 **Moonshine!** 14.95
 A fantastic and fun to read book, with an in-depth look at the history of moonshining from the beginning all the way to present day. This book also outlines the basic process from fermentation through to pot distillation, along with a how-to on building a traditional type pot stiller. A number of traditional recipes for Whisky, Rum, Schnapps, and more.

- 70001017 **The Joy of Home Distilling** 15.95
 The first truly A-Z distilling book, The Joy of Home Distilling is a complete guide for beginner and intermediate distillers. Readers will learn about every facet of distilling, from yeast styles and nutritional requirements to the different methods of distillation and equipment, and post-distillation processes. Author Rick Morris, who has been selling distillation equipment for years, even includes his own recipes for different types of spirits and drink recipes.
